

# Winter Storm Potential

Timing: Tonight– Tuesday Morning  
Updated 2/14/2021 11:00 AM EST

# Significant Winter Storm

## Tonight – Tuesday Morning

### What We Know

Heavy snow, sleet, and freezing rain are likely across Kentucky and southern Indiana late Sunday through Tuesday.

Greatest potential for significant ice accumulations will be south and east of a line from Tompkinsville (KY) to Richmond (KY).

Greatest potential for significant snow accumulations includes far southern Indiana and much of central Kentucky

Power outages are possible due to snow and previous ice accumulations on trees and power lines.

### What We Don't Know

The exact amounts and precipitation types at a given location.
